## PREMIUM ROTORS FOR PREMIUM BRAKE PADS

Wagner premium brake rotors are engineered for maximum performance and are an ideal pairing for Wagner premium brake pads. With a turned smooth surface finish for proper pad seating, an E-Shield® electrostatically-applied protective coating and tight tolerance specifications, Wagner provides service professionals with the premium product they need to get the job done right the first time. And it's all enclosed within a Vapor Corrosion Inhibitor (VCI) bag, reducing prep and installation time.

### PROPER BALANCE

- A precision-cut finish of the outer diameter of the rotor prevents improper balance issues that may result in vehicle control loss

### TURNED/SMOOTH SURFACE FINISH

- A smooth finish aids in the proper seating of the friction
- Less time needed for pad "break-in"

### UNIQUE VANE DESIGN

(application specific)

- Provides greater cooling capabilities for more effective stopping power
- Helps control noise, vibration and harshness (NVH), resulting in smoother braking

### E-SHIELD® COATING

- E-Shield® coating is electrostatically-applied to all non-braking surfaces which prevents corrosion
- Visually attractive coating is ideal for open spoke wheels

### TIGHTER TOLERANCE SPECIFICATIONS

- Reduces thickness variation and lateral run-out and ensures a balanced rotor
- Reduces pedal pulsation, brake noise and extends life of pads

### SUPERIOR METALLURGY

- Wagner Brake utilizes a combination of premium grade iron, a stringent casting process and a controlled manufacturing environment which results in superior performance

### VAPOR CORROSION INHIBITOR (VCI) BAG

- Ready to install right out of the bag – no additional rotor prep necessary
- Eliminates potential oil residue which may affect pad performance
