FITTED WITH  GOETZE[®] RINGS

ECOTOUGH[®]

A TECHNOLOGY COMES TO LIGHT.

ECOTOUGH[®]

Discover tomorrow today. The Nüral[®] EcoTough[®] NG piston skirt coating technology further reduces engine friction, wear and noise while handling the increasingly challenging loads and temperatures of FIAT's Firefly engine.

ENGINE EXPERTISE

STEP INTO THE FUTURE

The EcoTough[®] NG piston coatings have been specially designed to meet the extreme load conditions of internal combustion engines. Thanks to a metal oxide-reinforced construction with additional embedded solid lubricant particles, they **reduce skirt wear by up to 40%*** when compared to market standards with a surface application of just 15 microns. This also **reduces piston frictional losses by up to 15%***.

Direct comparison of simulated contact load (right) and EcoTough-New Generation piston skirt coating with no visible wear (left) after testing in a 1.6-litre petrol engine

This means EcoTough[®] NG significantly **improves fatigue strength** and **increases fuel efficiency** for an environmentally friendly engine that's **more durable and efficient** than ever before. Application of these piston skirt coatings using fully automated, large-scale production processes means the excellent wear and friction properties can be achieved within economical cost targets.

Claims for damages, of any form whatsoever, resulting from details made in this catalogue or from incorrect use, application, storage or handling, are explicitly excluded. Contractual rights and any resulting or related claims based thereon, irrespective of form, initially come into being on the basis of a separate written agreement, in particular on the basis of our general terms of sale and delivery.

All former statements lose their validity with the publication of this catalogue.

The catalogue is not an operating manual for the use and installation of pistons, liners and assemblies. It does not contain any advice in a legal sense. The catalogue neither replaces the constantly applicable technical regulations – particularly for tolerances – nor the installation and maintenance stipulations of the individual engine manufacturer.

Also, it is not possible to forego the expertise of those carrying out the installation and application. The individual references made in this catalogue for the installation and the application of pistons, liners and assemblies are instructions solely for the technically qualified specialist and are to be checked and verified by them for their suitability in each case. Tenneco accepts no responsibility for application decisions.

The contents of the catalogue are not intended to create or substitute any contractual agreement which has to be reserved exclusively to a separate agreement between 2 identified parties, whereby seller can be only one of our Tenneco entities as mentioned on the inside back cover.

The right is retained to correct errors and alterations, particularly with regard to amendments in the engine manufacturers' details and stipulations.
